aldo belleni morante started to write this book in february 2008 giving two provisional titles semigroups and evaluation equations in locally convex spaces an introduction or applied semigroups in locally convex spaces and he seemed on hurry for finishing it he decided to share his scientific viewpoint with the scottish colleagues prof adam c mcbride amb and dr wilson lamb wl from the strathclyde university he fully desired this collaboration as a consequence of some previous scientific works undertaken since 2006

at the strathclyde university along his appointment as permanent visiting professor he also considered the very early conception of this book since 2005 when he spent his latest sabbatical year in glasgow and further in 2007 when adam mcbride came to florence to work on this but not much work was done at that time to this end aldo started happily on his own research work to write the book and he completed his first part in 2008 unfortunately the first health problems arisen and this book stayed unfinished

all the traces of historic heritage are a fundamental part of our environment and reward us in the form of cultural enrichment with the ability to have a positive effect both on our lifestyle and economy therefore the preservation of ancient monuments historic towns and sites has increasingly drawn the attention of public opinion governmental agencies as well as consultants and contractors this interest must be however carefully controlled and directed since the conservation of monuments and historic sites is one of the most challenging problems of our age careless attempts at preservation can be detrimental not only to their iconic value formal integrity but even to their structural characteristics and the materials they are built with material integrity geotechnical engineering for the preservation of monuments and historic sites collects one opening address four special lectures and 82 contributions from all over the world giving a unique sample of the geotechnical problems to be tackled the solutions currently being proposed and the strategies being carried out to preserve the overall integrity of monuments and historic sites it is clearly apparent that differences exist around the world not only in terms of the characteristics of the monuments or sites to be preserved but also in the approaches adopted to achieve this aim hence no unique solution is available to the geotechnical engineer dealing with the delicate structures and sites that represent our cultural heritage and knowledge of previous experiences may be a unique guide in any technical decision making process
